SKILLS

PROGRAMMING

• Python • C/C++

DATA ANALYSIS

• Pandas • NumPy

ML FRAMEWORKS

• TensorFlow • Keras
• PyTorch • scikit-learn

DATA VISUALIZATION

• Matplotlib • Seaborn • PowerBI

DATABASE SYSTEMS

• MySQL

PROJECTS

POWER BI DASHBOARD SALES INSIGHTS

- Utilized SQL for data cleaning and analysis of sales data.
- Created a comprehensive PowerBI dashboard to visualize and gain insights into sales trends.

DOG CAT CLASSIFICATION MODEL

- Developed an AI model which can classify an image as a cat or a dog.
- Accuracy 95%

CREDIT SCORE CLASSIFICATION

- Created an ML model which can classify a person's credit score based on his information.
- Worked On data cleaning and visualization to get the best out of the data and train the model.

BULLDOZER PRICE PREDICTION, TIME SERIES

- Use Numpy and Pandas to organize and clean the data.
- Trained an ML model to predict the price of a bulldozer.

PAPER TRADING WEBSITE

- Built a web application for learning and practising trading.
- Implemented a paper trading feature, allowing users to practice trading strategies effectively.

HEART DISEASE CLASSIFICATION USING ML

- Developed a machine learning model for heart disease prediction.
- Leveraged historical data to classify individuals as having or not having heart disease.

CERTIFICATES

PYTHON

- 100 Days of Python, Udemy
- Python Certificate, HackerRank

MACHINE LEARNING

- Machine Learning & Data science Bootcamp 2022, Udemy

SQL

- SQL Certificate, HackerRank

VOLUNTEERING

PISB IEEE

- Successfully conducted Python SIG for FE students under PISB.
- Conducted the Datawiz competition twice, once during Credenz and once during CTD, both of which are PISB club events.
